

Post Graduate Programme in **Sustainable Management (PGPSM) 2018-2020**

This is the first and the only sustainability-focused MBA programme offered by any of the IIMs in India and is one of the handful of such programmes offered in South Asia.

IIM Lucknow takes pride in being the frontrunner amongst the IIMs to introduce a program which inculcates the essence of sustainability in conventional business education. PGP Sustainable Management is a two-year full-time postgraduate program being offered at Noida campus. It is designed to help managers develop a holistic perspective and imbibe the ethos of socio-environmental responsibilities. Also, to equip them with the skills to assess and to preserve the interests of all stakeholders in a dynamic and unpredictable environment.

A minimum of 02 YEARS of work experience is a prerequisite for selection into the program. The criterion ensures that the candidates are pre-equipped with a deep understanding of the corporate world and possess the strong business acumen to better appreciate the rationale of business enterprises and the nuances of the complex environment in which it operates

The uniquely designed PGPSM curriculum with extensive coursework, live projects, and interaction with industry leaders transforms the talented, bright and experienced students into responsible business managers through a perfect blend of general management skills and in-depth understanding of business sustainability concepts.

PGPSM Batch (2018-2020)

ABHISHEK KUMAR

B.Tech (Information Technology)

Leadership Talk Series

At IIM Lucknow– Noida Campus, a series of guest lectures by distinguished business leaders, policymakers, and eminent entrepreneurs take place throughout the year. It is a student-driven activity that presents them with a great opportunity to engage with thought leaders and visionaries on a rich vein of subjects; varying from complex leadership and strategic business challenges to the social impact of corporations, from success and failure stories to nation-building deliberations.

International Immersion

The international immersion module sensitizes the participants towards the best practices and robust administrative structures which exist in countries like Sweden, Denmark and Netherlands which are considered pioneers of sustainable development. A two-week sojourn in world-renowned institutions like Linnaeus University, Maastricht School of Management is aimed at enriching the experience of a meaningful immersion.

The rigorous academic schedule is highly complimented with a conscious and deliberate industry interaction with experts from organizations such as IKEA of Sweden, Dong Energy, Rockwool and Volvo, Electrolux which are Industry benchmarks for sustainability in their respective sectors. Moreover, the participants actively engage with local municipal bodies and citizen groups who are often instrumental in bringing about behavioural changes in society towards sustainable living. The programme also creates a platform for cultural exchange among participants and the local community.

Integrated Project

Students have a mandatory requirement of doing an Integrated Project with the industry for 6-9 months during their Second year. Integrated Project adds to their skills and makes them holistic leaders with the potential to be recruited as mid-level managers. Some of the organizations with which students have worked in the past are – E & Y (Climate Change and Sustainability Services), Fortum, Generation India (McKinsey Social Initiative), Schneider Electric, FICCI, GIZ, NTPC, Mahindra Susten, GHCL, American India Foundation (AIF), SoftBank Energy, Amplus Solar, IndusInd Bank, Think Through Consulting, IIEC, Tata Sustainability Group, World Bank, GE, and Vikram Solar.

Director's Message

We are presently at a juncture of human history when our businesses cannot be made successful without roping in the crucial facets of sustainability within its strategy. Amalgamating such a strategy with the aspiration to maintain economic, social and environmental synergy is one of the most crucial goals of modern leaders. This evolving paradigm brings into foray a new challenge in front of the leaders; finding individuals with the right level of empathy, intent, knowledge, skill and experience to work for achieving the evolved ambition of their businesses. To cater to this ever-growing need of the businesses; IIM Lucknow with its vision of providing socially conscious and globally relevant thought leadership; became a pioneer in introducing a dedicated two-year full-time Post Graduate Programme in Sustainable Management (PGPSM) from its Noida campus. I warmly and proudly present the Post Graduate Programme in Sustainable Management. I cordially welcome you to take part in our placement process and jointly contribute to building sustainable societies.

Prof. Archana Shukla
